WORK EXPERIENCE

PROXY SERVER - UI/UX DESIGNER (CONTRACTED)

JAN 2016 - PRESENT

Proxy Server strives to protect people, their data and their identity by giving them a safer way to connect to the internet. I'm currently redesigning their entire front-end, client, and other assets.

COOLEAF - DESIGN INTERN

MAY 2015 - JULY 2015

Based in Atlanta Tech Village, Cooleaf promotes employee engagement with their easy-to-use platform. At Cooleaf, I helped design the Android app, designed the iOS app, redesigned the marketing site, newsletter, and other assets.

SPECTRACOM GROUP - JR. GRAPHIC DESIGNER

JUNE 2014 - JULY 2015

While interning at Spectracom Group, a company focused on ecommerce, I was involved in a variety of projects. I designed email layouts, updated the SPG brand, wrote extensive blog posts, and redesigned the website UI.

PERSONAL PROJECTS

UGA HACKS - ORGANIZER & LEAD DESIGNER

OCTOBER 2015

UGA Hacks is a hackathon and organization at the University of Georgia that wants to cultivate the passion and technical abilities of students with the maker mentality. As the team's designer, I designed everything from the site, to all printed material.

BITMO - LEAD DESIGNER

FEBRUARY 2015

Bitmo offers users to easily convert dollars to Bitcoin, and vice versa. I designed the landing page, the interface of the web app, and brand, with the developer.
